ABSTRACT

~~POWERED MOVABLE STOWAGE~~

A vehicle has on its top a moveable stowage ~~comprising~~ including a longitudinal member 10 on which is ~~M~~mounted a transmission ~~means~~ device 11 driven by a motive force 12 and an attachment ~~means~~ 14 by which the stowed item 15 is attached to and moved ~~on to~~ onto and off the stowage. ~~t~~The longitudinal member 10, is propelled by a second transmission ~~means~~ 18 device powered by a second motive force 19. The longitudinal member moves on a base member 16 that is pivotally attached to a mounting 17. ~~a~~A third motive force 21 ~~causings~~ causes the base member 16 to pivot about the mounting 17 ~~the total combined movements transporting~~ such that the stowed item is transported to and from the access position ~~shown to and~~ from a stowage position on top of the vehicle.
